

XEROX CORPORATION

For over 18 years Paradigm Environmental Services has and still provides Inspection Services, Air Monitoring /Project Monitoring and Design services for all Maintenance, Construction and Demolition related activities. Paradigm provided field and analytical capabilities for one of the largest manufacturing facilities in the Northeast. Xerox Corporation is made up of over 100 buildings encompassing over 10 Million square feet. These services were offered and performed 24 hours a day, 7 days a week, 365 days a year.

As with any operational public buildings, attention to detail and communication are essential. Paradigm has coordinated abatement activities with the building owner, building occupants, contractors, architects and construction managers. These services include environmental testing services, asbestos project monitoring, asbestos air sampling, and asbestos design services for removal of asbestos containing materials.
